Career Objective

Driven to make a lasting impact, I am excited to embark on an entry-level journey with a forward-thinking organization like yours, where I can contribute my skills and enthusiasm to drive digital transformation and cultivate a lifelong passion for innovation and growth.

Education:

B.Tech in Electrical & Electronics Engineering Sri Vasavi Engineering College(A) 80.41%	2021 - 2025
Board of Intermediate Vikas Junior College 95.6%	2019 - 2021
Board of Secondary Education Vignan English Medium High School 90.25%	2019

Technical Skills:

Programming Languages: C, Java.

Concepts: Object Oriented Programming & Data Structures in C.

Soft Skills:

- Creativity
- Communication Skills
- Problem-Solving
- Crisis Management
- Social listening

Experience:

Telecom Engineer Techwave Hyderabad	Feb 2025 - Oct 2025
• Worked on telecom network design and planning projects for Europe, USA and Australia regions. • Utilized IQGEO for network asset management and geospatial mapping of telecom infrastructure. • Designed and updated telecom layouts and network schematics using ProgeCAD software. • Coordinated with cross-functional teams to ensure compliance with regional telecom standards and client requirements. • Contributed to optimizing fiber and copper network designs, improving data accuracy and project delivery timelines.	
Embedded Systems Intern NIT AP Tadepalligudem	Jun 2024 - Jul 2024
• Researched and gained expertise in STM32, Discovery and Arduino microcontroller boards. • Performed simulation analysis on STM32 and Discovery boards using STM32 CUBE IDE. • Gained hands-on experience with embedded systems design and development.	

Projects:

Food Quality Monitoring System using IoT

- Designed and implemented an IoT-based Food Quality Monitoring System using **ESP32** and **DHT11/MQ sensors** to track temperature, humidity and gas levels.
- Programmed the **ESP32** to collect and transmit real-time sensor data via Wi-Fi using **Arduino IDE**.
- Integrated the **Blynk IoT app** for live data visualization, remote monitoring and instant spoilage alerts on mobile devices.
- Developed a threshold-based alert system to notify users of unsafe food storage conditions.
- Optimized system performance by using **deep sleep mode** in ESP32 to improve energy efficiency.

Automatic Paddy Bags Protection from Heavy Rainfall

- Developed an **IoT-based system** to automatically protect stored paddy bags from unexpected rainfall using **Arduino UNO**, rain sensor and motorized cover.
- Programmed the **Arduino UNO** to detect rainfall and activate a **Stepper motor** to deploy a waterproof cover over paddy bags during bad weather.
- Designed to minimize post-harvest crop damage and improve storage protection for farmers, especially during the rainy season.
- Skills Utilized: Arduino IDE & Sensor Integration.

Certifications:

- Basics of Python, Infosys Springboard.
- Data Analytics with Python, NPTEL.

Personal Details:

Date of Birth : 15/11/2002
Gender : Female
Nationality : Indian
Languages Known : English, Telugu, Hindi

Declaration:

I hereby declare that all the details mentioned above are in accordance with true and fact as per my knowledge and I hold the responsibility for the correctness of the above mentioned particulars.

Place: Hyderabad
